

Modules and Options

Module	
Inspire	Provides an interactive image gallery for capturing visitor interest and qualifying leads. Users can create customized rooms and quickly narrow down their preferred styles and preferences.
Define	Provides an immersive 3D tool for planning spaces, creating personalized interiors, and configuring products. Define re-uses all of the user's preferences created in the Inspire Module so that it can be used in a design.
Collaborate	Provides a personal project space and the ability to create and collaborate on a project. Project-based retailing is greatly enhanced with this package.
Options	
Integration Toolkit	Development APIs for complete integration of business systems

Features by Module

Inspire	Define	Collaborate
For Retailers and Designers		
Prepare sample interactive pre-sets and showrooms	Assist the consumer with design recommendations by packaging different scenarios which the consumer can explore on their own time	Search and retrieve a consumer's project
Select and modify all of the elements in the featured designs, including appliances, bathroom fixtures, item materials & colors	Retrieve the customer's design and/or project (if collaborate is also used)	Become a collaborator and assist the consumer
	Complete the consumer's design for them using the same tool	Assist users from anywhere
	Add specialized products and services to complete the design and bill of materials	Take part in consumers' project discussions
		Send messages using the discussions feature and reminders to the consumer
For Consumers		
Explore different styles and preferences	Create a dream kitchen or bathroom in 2D or 3D	Take the project home and access it from anywhere
Change colors, styles and designs easily with a single click	Create room layouts with exact shape and measurements of a room	Invite collaborators
Ease of use	Automatically generate a design based on selected options	Discuss design ideas and share the excitement
Apply and add styles, colors, preferences and products from Inspire to Define room layout	Place objects like appliances, furniture and cabinetry in the layout	Receive notifications about the project
Evaluate options based on pricing early on in the project	Apply styles and preferences from Inspire to an actual room layout	Store image gallery of personal photos or project renderings
Budget scoping	Configure products and visualize the effect of changes	Include product documentation on features and warranty
Open pre-set room in 3D as a starting template for creating a new design	View the actual bill of materials for a design, with the exact product prices	Take a photo of the final design and share it
	Easily pair items and personalize designs	
	Finalize transaction: buy online or in store	

2020 Virtual Planner and 2020 Ideal Spaces Feature Comparison

	VP 4.6	VP 4.7	Ideal Spaces
Generating kitchens automatically using user preferences	×	×	✓
Larger, more immersive 3D space planning	×	✓	✓ +
More realistic, high-quality rendering	✓	✓	✓ +
Improved usability enhancements	×	✓	✓ +
Natural lighting for different times of the day	×	×	✓
User-defined arbitrary room shape layouts	×	×	✓
User-specified catalog/product favorites	×	×	✓
3D viewer snapshot capture	×	×	✓
Change a common feature between configurable products	×	✓	✓ +
Responsive user interface based on screen size	×	×	✓

System Recommendations

WINDOWS DESKTOP:

Operating System: Windows 7 or higher

Processor: 1 GHz Dual Core or faster for SQ rendering
2 GHz Quad Core or faster for HQ/HQ+ rendering

Graphics Card: Support for Direct X 9.0c or higher

Internet Connection: 2 Mbps or higher

Windows Browsers: Internet Explorer 11, Firefox 40+,
Chrome 44+, Edge 25+

MAC DESKTOP:

Operating System: Mac OS X Mavericks 10.9 or higher

Processor: 1 GHz Dual Core or faster for SQ rendering
2 GHz Quad Core or faster for HQ/HQ+ rendering

Graphics Card: Support for OpenGL 2.0+

Graphics Card Memory: 2 GB or higher for SQ rendering
4 GB or higher for HQ/HQ+ rendering

Internet Connection: 2 Mbps or higher

Mac Browsers: Safari 7.0+, Firefox 40+, Chrome 44+
